

Ameer Jamal

Senior Full-Stack Software Engineer

Tucson, Arizona, United States

Email: Ameer10194@gmail.com

GitHub: <https://github.com/Ameer-Jamal>

LinkedIn: <https://www.linkedin.com/in/ameer-jamal>

Personal Developer Portfolio: <https://ameer-jamal.github.io>

Professional Summary

Senior Full-Stack Software Engineer specializing in enterprise SaaS, Angular, Java/Spring Boot, AWS event-driven systems, and developer automation. Experienced in performance optimization, security remediation, cloud-native data pipelines, PDF generation services, and AI-assisted engineering tools. Strong record of owning cross-stack initiatives from architecture and database design through production rollout.

Technical Skills

- **Frontend & Mobile:** Angular, Angular Material, PrimeNG, Ag-Grid, RxJS, TypeScript, HTML, CSS/SASS, Apache Cordova, hybrid Android/iOS applications
- **Backend & DevOps:** Java (Spring Boot), Node.js, Python, REST APIs, SQL, Flyway, Docker, Jenkins
- **Cloud Architecture (AWS):** Lambda, S3, SQS, SNS, DynamoDB (Streams), EC2, ECS Fargate
- **Libraries & Tooling:** Puppeteer, Apache POI (SAX streaming), Snky (Security Remediation)
- **Software Engineering:** Event-Driven Architecture, Memory Management/Optimization, Object-Oriented Programming, Secure Coding Practices, AI fundamentals
- **Certifications & Methodologies:** Professional Scrum Master™ Certified (98.8%), Agile Development

Professional Experience

Senior Full-Stack Engineer — Octave | ETQ

Tucson, AZ, USA | Jan 2026 – Present

- **Security & Vulnerability Remediation:** Remediated Snky-reported path traversal and regex performance vulnerabilities across backend Java services while preserving legacy behavior.
- **Platform Modernization:** Led cross-stack implementation of Datacenter System Preferences across Java/Spring Boot, Angular, and Flyway, including idempotent migrations, backend routing, computed fields, visibility/read-only rules, localized tooltips, save-time banners, lookup filtering, and license-gated AI feature settings.
- **AI Tooling & Automation:** Built internal AI-assisted engineering tools and workflow automations to improve code analysis, knowledge access, and developer productivity.

Associate Full-Stack Engineer — Hexagon | ETQ

Tucson, AZ, USA | May 2023 – Jan 2026

- **Event-Driven AWS Data Pipelines:** Architected a high-throughput asynchronous batch import pipeline using AWS S3 ObjectCreated events, Lambda, SQS, and DynamoDB Streams to support large multi-tenant data uploads.
- **Memory Optimization & Streaming:** Resolved AWS Lambda Out-Of-Memory failures by replacing legacy in-memory Excel parsing with Apache POI SAX streaming, enabling million-row imports while keeping SQS messages under the 1 MB limit.
- **Import Reliability & Observability:** Improved asynchronous import reliability by adding failed-row error reporting, S3-backed error file generation, DynamoDB/SQS metadata propagation, duplicate handling validation, and Lambda memory/time diagnostics.
- **PDF & Printing Modernization:** Overhauled a legacy Node.js/Puppeteer PDF capture service and improved enterprise print rendering workflows, offloading heavy image rendering to Angular, optimizing headless execution, and reducing 10k-page document generation time by 20+ seconds.
- **Frontend Performance (Angular/RxJS):** Optimized enterprise frontend interfaces using virtual scrolling, RxJS debouncing, custom state caching, and targeted unit/regression coverage for large datasets and complex workflows.
- **Hybrid Mobile Platform Modernization:** Modernized an Apache Cordova-based enterprise mobile application by upgrading Android/iOS platform versions, replacing deprecated plugins, fixing build/runtime issues, updating permission and splash/icon handling, and supporting Jenkins packaging changes from APK to AAB.

Web Developer Intern — RealSoft Advanced Applications

Amman, Jordan | Jun 2022 – Aug 2022

- Developed full-stack web applications using modular design and modern frameworks.
- Engaged in frontend design and backend integrations, contributing to real-world website development projects.

Sales Representative & Implementation Consultant — Augustus Marketing & Investments

Amman, Jordan | Oct 2020 – Aug 2021

- Consulted with prospective clients on SEO, social media marketing, and web development solutions.
- Conducted client negotiations, database and spreadsheet analysis, mockup implementations, and project delivery coordination.
- Supported client-facing UI/UX mockups and multimedia editing work using Photoshop, Lightroom, GIMP, Audacity, and BandLab.

English Instructor — Nell Program Academy (Training & Development)

Amman, Jordan | Feb 2016 – Jan 2017

- Taught English to classes of 30+ children aged 5–10, enhancing their vocabulary and communication confidence.

Education

Bachelor of Science in Computer Software Engineering

Princess Sumaya University for Technology (PSUT) — 2018-2022

Certifications & Training

- **AI Data Integration: Model Context Protocol (MCP) Architecture** — Udemy (2026)
 - **Emporia Certified Contributor (Python & Full-Stack)** — Emporia Research (Valid thru Dec 2027)
 - **Secure Coding and Design Best Practices in Java** — Udemy (Dec 2023)
 - **Data Structures and Algorithms** — Zero To Mastery Academy (Apr 2023)
 - **Professional Scrum Master™ I (PSM I)** — Scrum.org (Oct 2022) | Score: 98.8%
 - **Python and Machine Learning** — King Hussein Business Park (Nov 2021)
-

Projects & Open-Source Contributions

- **Personal Developer Portfolio:** <https://ameer-jamal.github.io>
 - **Projects and Open-Source Contributions:** Created 26+ public repositories on GitHub encompassing AI tooling, automation, UI themes, and developer utilities.
 - **RepoLens:** A UI and Model Context Protocol (MCP) tool designed to simplify communicating changes in Git repositories through AI analysis of Git diffs.
 - **localPilot:** Local, private AI chat for JetBrains IDEs, backed by Ollama.
 - **LogOne:** Parse server logs, view deduplicated lines, extract SQL, and run **local** AI analysis via [Ollama](#) no cloud API key required.
 - **MemoryAnalyzer:** A real-time Python monitoring tool to log and analyze CPU and memory usage for specific processes.
 - **readableSQL:** A PyQt5-based GUI to automatically reformat messy SQL (INSERT, UPDATE, SET) into clean, consistent, human-readable blocks with embedded JSON formatting.
 - **RemoveImageBG:** A cross-platform desktop application for intelligent background removal and rapid image cleanup, powered by the IS-Net model bundled with rembg.
 - **DockerBacker:** A utility script to enable Docker volume and database backups/restores on the fly.
 - **Custom Front-End Redesigns:** Created a popular ChatGPT Material Dark theme (5,100+ downloads) to improve readability and user experience (<https://github.com/Ameer-Jamal/ChatGpt-Material-Dark>).
-

Languages

- **English:** Fluent
 - **Arabic:** Fluent
-

Additional Interests & Skills

- Musician and guitarist, creative writing
- Motorcycle and Automotive enthusiast
- U.S. citizen; authorized to work in the United States without sponsorship.
